Duration	11 mins 39 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

a. It works on unsorted lists
b. It compares elements sequentially
c. It can be applied only if the list is sorted ✓
d. It always starts from the beginning of the list

Question **2**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is the last element in the array
b. When the item is somewhere in the middle of the array ✓
c. When the item is not the array at all
d. Item is the last element in the array or item is not there at all

Question **3**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Sorting the list before searching
b. Checking each element sequentially ✓
c. Dividing the list in half repeatedly
d. Skipping every second element

Question **4**

Correct

Mark 1.00 out of 1.00

If a list contains 1000 elements, how many comparisons would a binary search typically make in the worst case?

- a. 10 ✓
- b. 500
- c. 1000
- d. 100

Question **5**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

- a. When the list is unsorted
- b. When the list contains duplicate elements
- c. When the list is sorted ✓
- d. When the list is very small

Question **6**

Correct

Mark 1.00 out of 1.00

_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.

- a. Selection
- b. Bubble ✓
- c. Complexity
- d. Insertion

Question **7**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

- a. Linear search ✓
- b. Both (1) & (3)
- c. Binary search
- d. Hash search

Question **8**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

- a. Searching ✓
- b. Mining
- c. Finding
- d. Discovering

Question **9**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

- a. The list must be sorted
- b. There should be direct access to the middle element in any sublist
- c. Number values should only be present

  Number values should only be present
- d. There must be a mechanism to delete and/or insert elements in the list ✓

Question **10**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

- a. The search continues in the left or right sublist ✓
- b. The list is sorted
- c. The search continues from the beginning
- d. The search stops

Question **11**

Incorrect

Mark 0.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 100; What are the mid values(corresponding array elements) generated in the first and second iterations?

- a. 90 and 100 ✗
- b. 90 and 99
- c. 94 and 99
- d. 89 and 94

Question **12**

Correct

Mark 1.00 out of 1.00

In the context of searching, what is a successful search?

- a. When the list is sorted
- b. When the element is found in the list ✓
- c. When the search algorithm finishes
- d. When the list contains duplicate elements

Question **13**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

- a. Sorting elements in a list
- b. Inserting elements into a list
- c. Determining whether an element is present in a list ✓
- d. Deleting elements from a list

Question **14**

Correct

Mark 1.00 out of 1.00

What is the advantage of binary search over linear search?

a. Binary search works on unsorted lists
b. Binary search does not require dividing the list
c. Binary search can find multiple instances of the target element
d. Binary search has a lower time complexity on large, sorted lists ✓

Question **15**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

a. 89 and 99
b. 90 and 94
c. 90 and 99 ✓
d. 89 and 94
